**beatochess original studies** 103

**My studies** 106

## **Introduction**

The **beatochess** homepage is a repository of ongoing work. It contains

- revisions (corrections, versions, modification) of and comments on studies by other authors
- a collection of my own studies

## **Updates since last version**

Not applicable (since this is the first version)

## Legend

- (c): correction; i.e. original study was unsound.
- (m): modification; i.e. original study was sound, the improvement has another motivation.
- (s): corrected solution (without changing the position).
- (v): version (perhaps a correction or a modification).
- BN: Beat Neuenschwander
- AN: 100% anticipation: the whole study was published earlier by someone else.
- CR: colours reversed (the original stipulation was: Black to win/draw).
- MC: too many composers to fit the “White” field. All names given as text before the first move.
- PH: posthumously published.
- SSZ: Schweizerische Schachzeitung
- TE: theoretical ending (i.e. probably not an endgame study).
- TT: theme tourney.
- TW: twin study (also triplicates, quadruplates, etc).
- U1: second solution (at move 1).
- U2: cook; extra solution after move 1.
- U3: incorrect; White is unable to fulfil the stipulation (in a win study Black draws or wins; in a draw study White loses).
- U4: “super-cook”. White can even win in a study with a draw stipulation.
- U5: illegal initial position.

## Revised studies (corrections, etc.)

Note: in my revisions, the author will be given as “Original Author BN”. This is a small deviation to the **HHdbVI** database by Harold van der Heijden, where the author of the revision is only mentioned in the solution.

### Studies by Zakhodyakin

There are 248 studies in **HHdbVI**, of which 203 are original studies by Zakhodyakin and 45 are revisions (33 corrections, 3 modifications, 4 versions). Of the original 203 studies, 82 (40.4%) have been cooked over time.

In this section, you find a few new cooks, comments, and revisions.

Date: 2024, May 7

File: Zakhodyakin1982g.pgn

The first two moves can be interchanged. This can easily be fixed by placing the black bishop on a different square, allowing the refutation **Rg7** after **1. Kh1**. The correction adds a bit more spice, at the cost of an additional white pawn.

The correction of the prize winner is even shorter than the original, but it keeps the main ideas (bishop inference sacrifice and queen sacrifice leading to stalemate).

+0027.01c3e6 (1931). Correction

Date: 2024, April 19

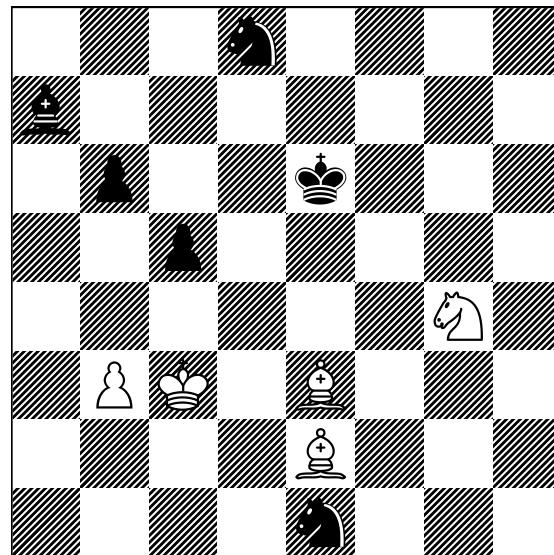

File: Zakhodyakin1931b.pgn

The study seems hard to fix with the original material because two bishops vs. knight (and even a few pawns) will often be lost. The correction requires quite a bit of additional material.

=3016.10b3f4 (1983). Cook? Version

Date: 2024, April 16

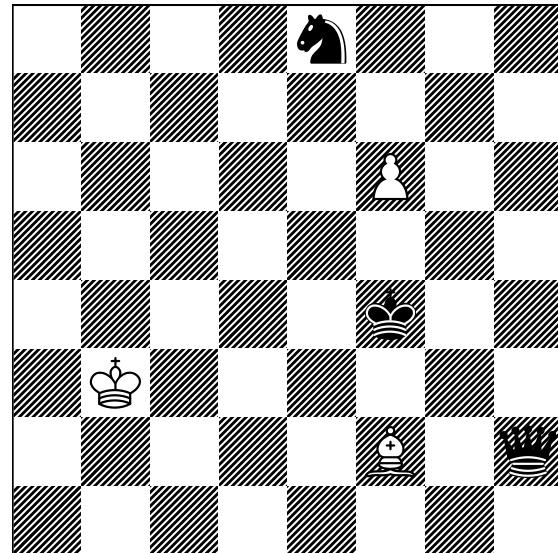

File: Zakhodyakin1982c.pgn

Black's **3... Nc4** is much more dangerous and requires precise White play. With this as the main line, the study is correct. The version is more parsimonious and interesting due to the fact that the black queen has the square h8 at her disposal.

+3200.33g1h4 (1967). Version

Date: 2024, April 7

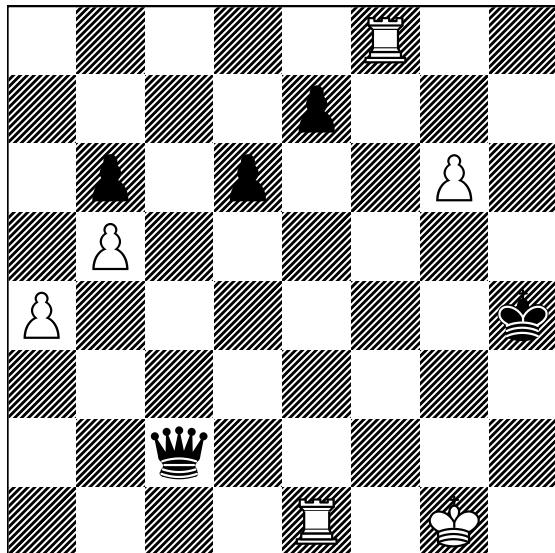

File: Zakhodyakin1967.pgn

The RRvsQ ending seems difficult to fix: the white rooks are simply too strong given the bad position of the black king. In addition to the cook on move 1, there is also the alternative win 4.Rg1 in the main line.

The version shows the theme (luring the black queen to g7 and trapping it) with a white knight and rook.

=0002.02c8e8 (1949). Correction

Date: 2024, April 4

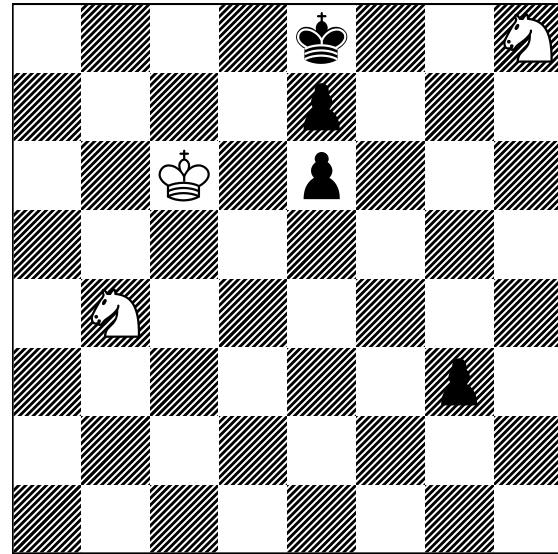

File: Zakhodyakin1949.pgn

Adding a black pawn on e6 correct the study. However, there are two interesting features which do not change the content of the study. First, the white king could as well be on c6. Second, the black pawn could be on g3. The latter allows the black knight to be on b4 rather than b8, which makes the first move even more surprising. The correction uses these findings.

+0031.22b8a6 (1930). Correcction, modifications

Date: 2024, March 24

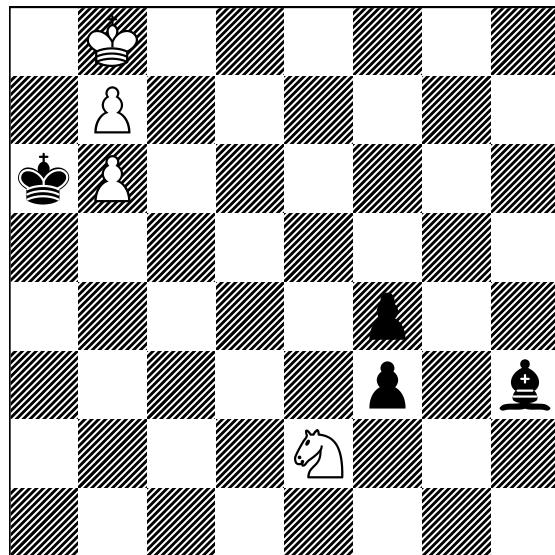

File: Zakhodyakin1930d.pgn

In addition to Mario's cook **1.Nd4**, the queen promotion **6.b8=Q** at the end also wins. The second study is a same material correction, whereas studies 3 and 4 are modifications.

Mario's attempt to correct the study failed, but Peter succeeded. My version is another correction, a bit more in the light-material spirit of Zakhodaykin's original.

This is an interesting study. The white knight supports the mating attack by four blocks of the black queen checks. Unfortunately, White also wins after **1.Qc4+!**. The second study is a same-material correction, and the third one is a version adding one block in the main line and four blocks in the side lines, leading to a total of nine knight blocks.

### Weenink +0440.44g5b2 (1922). Correction

Date: 2024, May 24

File: Weenink1922a.pgn

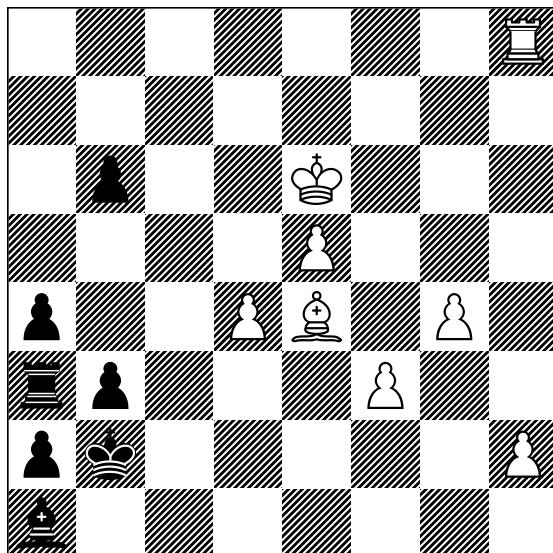

Note that Garcia's cook also applies to the main line. Moreover, there is a minor dual (Rf6+ instead of Rg5) on move 13. The additional white pawn on h2, which closes the h-file, saves the study. The other changes in the position are not really important.

Date: 2024, May 18

File: Weenink1919b.pgn

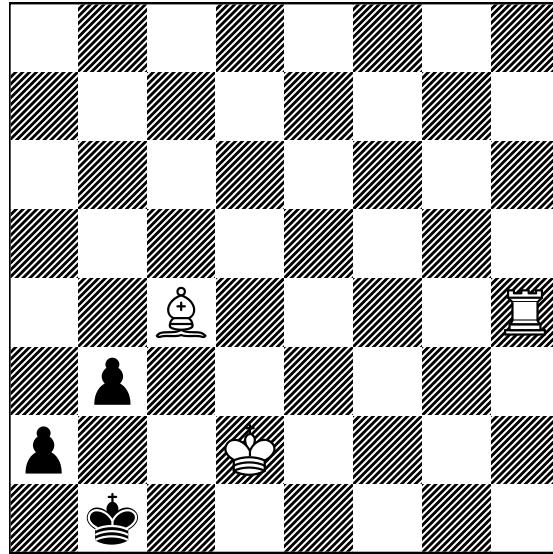

Simply moving the rook to h4 (or any square between the fourth and last rank) corrects the study, as correctly noted by Rueb. An additional move is possible, as shown in my correction; here, however, note that the rook cannot be on h4 due to 1. Bc4 b2! 2. Bxa2 Kxa2 3. Ra4+ Kb3.

**Weenink +0130.11c2g4 (1919). Correction (twin)**

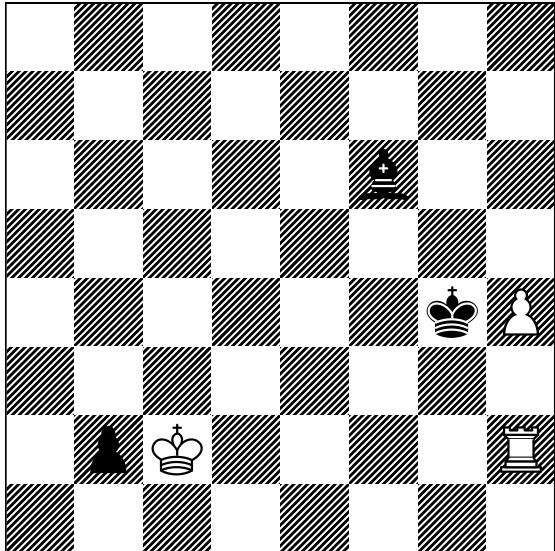

Date: 2024, May 17

File: Weenink1919a.pgn

The cooks on move 2 are serious. On the other hand, the cook on move 11 is less relevant. The position after **4. h7 Bh8** can be won in various move orders, but the idea is the same (zugzwang). The study can be saved by getting rid of the cook on move 2 and stop the main line when the white pawn reaches h7.

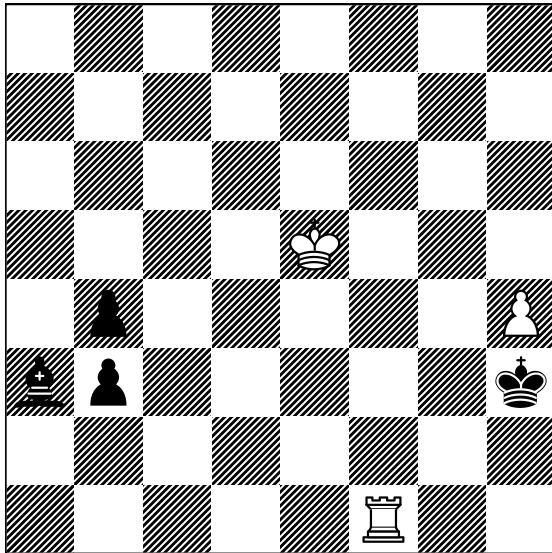

The version is a twin study which has considerable more content than Weenink's original study.

### Weenink +0050.01c6e7 (1918). Correction

Date: 2024, May 15

File: Weenink1918c.pgn

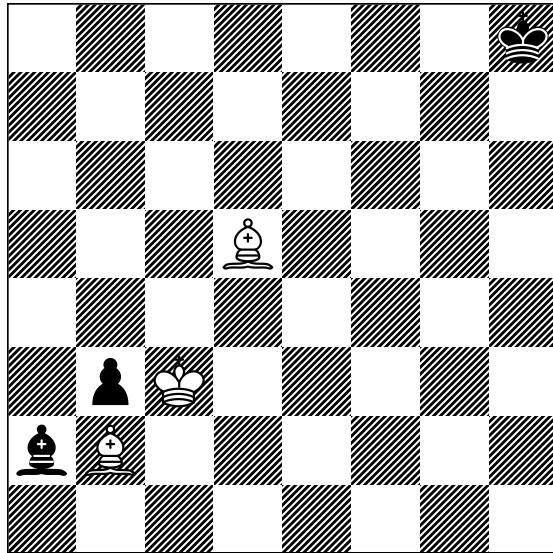

In Weenink's original study, various first moves lead to a win. The key of the study is to keep black king on the last rank (or the h-file), which is shown in the correction.

Date: 2024, March 20

File: Korolkov1929.pgn

1. Qg4 is a dual in Korolkov's study because the probably intended 1... Bc2 is not sufficient for a Black advantage. Adding a black pawn on a4 is a simple correction.
