1 Recent publications

1.1 Schach-Aktiv

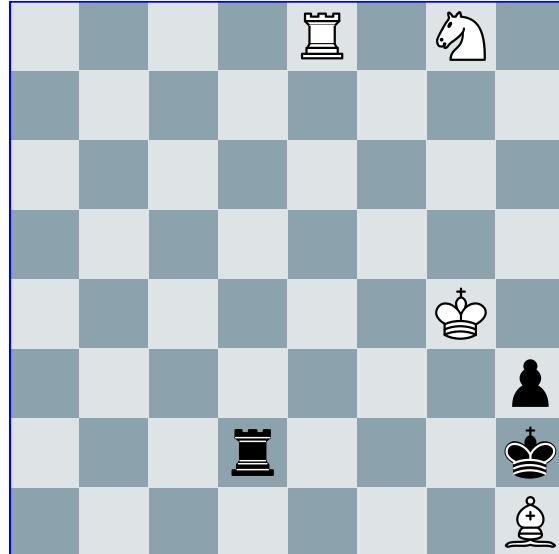

I have dedicated the two following studies to **Michael Ehn**. Michael is a leading chess historian and author of many marvelous chess books. He has run the chess shop “Schach und Spiele” in Vienna over three decades. Whenever I have been visiting Vienna in recent years, I had the pleasure of meeting Michael in his shop. I hope Michael will continue his chess activities, and I am looking forward to his publications in the future.

Harold's comments for the two studies in the provisional award:

“...It is a pity that the study starts with BTM, but it is not really disturbing here. All lines are crystal clear. This is a very good castling study!”

“Before the award candidates were checked for possible anticipations, I assumed 6 bishop sacrifices (of which 2 in sublines) on different squares was a task record and hence it opted for a good spot in the award. I did recall a study by Ornstein, version by Timman (#023216), and that happened to have also 4+2 B-sacs. It has a similar matrix, but with the bishops running on white squares. In total 16 studies were found with 4 B-sacs or more in the main line. But the record holder is Hoch (#052812) that has 10 B-sacs on 8 different squares, with 4 B-sacs in sublines. Moreover, its setting is very economical.”

1.3 Sinfonie Scacchistiche

2.1.27 Zinar +0000.44f7e5 (1977). Comment, cook, correction

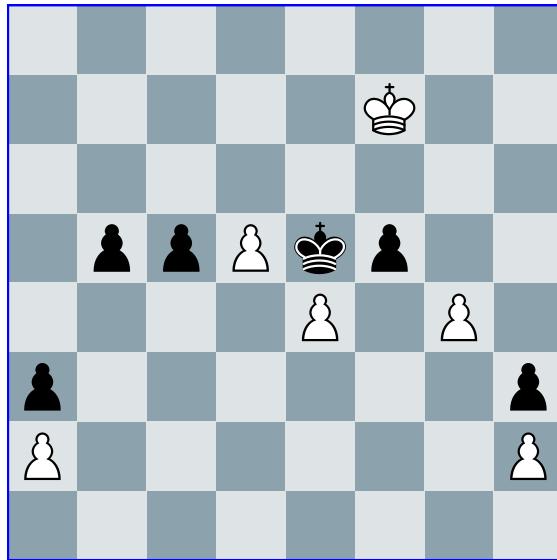

- The study has six thematic mainlines; see EG no. 53 (page 58). The line 1... fxg4 2. d6 g4 3. g3 d7 g2 is not marked as a mainline in HHdbVI.
- The main problem is that two of the mainlines are cooked.
- The correction seems to fix the study. Of note: there is a 7th promotion (on b1). However, since the win is not thematic (i.e., not achieved by winning the black queen), I consider this a sideline. A version with 7 thematic promotions seems hard to achieve.
